CHEBYSHEV-LIKE MATRIX POLYNOMIALS OF TWO VARIABLES

Tadayoshi Takebayashi

Abstract

In [R. S. Batahan, A new extension of Hermite matrix polynomials and their application, Linear Algebra and its Application 419 (2006), 82-92], Batahan defined the Chebyshev matrix polynomials of two variables of the second kind. We define Chebyshev-like matrix polynomials of the same type including them.
