**Abstract**

Within this paper, weakly  $P_0$  spaces and properties continue to be investigated revealing additional unexpected results, the complete characterization of weakly  $P_0$  properties and other known properties are used to completely characterize weakly  $P_1$  properties, and the weakly  $P_1$  process is completely internalized, greatly simplifying that process and revealing additional unexpected results.

**Keywords and phrases:** weakly  $P_1$  properties, weakly  $P_0$  properties, maximal subspaces.
