### Abstract

Within this paper weakly  $P_2$  properties continue to be examined revealing additional insights into both weakly  $P_2$  and weakly  $P_1$  properties, including the discovery that for weakly  $P_2$  spaces,  $T_0$ ,  $T_1$  and  $T_2$  are all equivalent.

**Keywords and phrases:** weakly  $P_2$  properties,  $T_0$ -identification spaces, weakly  $P_1$  properties.
