

TETRAHEDRON MAPS ASSOCIATED TO THE LINEAR EQUATION

Tadayoshi Takebayashi

Received December 8, 2017

Abstract

We calculate tetrahedron maps ([V. E. Adler, A. I. Bobenko and Yu. B. Suris, Classification of integrable equation on quad-graphs, the consistency approach, Comm. Math. Phys. 233(3) (2003), 513-543], [R. M. Kashaev, I. G. Korepanov and S. M. Sergeev, The functional tetrahedron equation, Theoret. and Math. Phys. 117(3) (1998), 1402-1413]) associated to the linear equation ([V. E. Adler, A. I. Bobenko and Yu. B. Suris, Discrete nonlinear equations, Classification of integrable cases, Funct. Anal. Appl. 43 (2009), 3-17], [N. Joshi, N. Nakazono and Y. Shi, Reflection groups and discrete systems, J. Integrable Syst. (<http://arxiv.org/abs/1605.01171>) 2016]).
