

WEAKLY P_0 , T_0 -IDENTIFICATION P , AND
NOT-TOPOLOGICAL PROPERTIES

Charles Dorsett

Abstract

Within recent papers weakly P and T_0 -identification P properties were introduced. In those papers, T_0 and “not- T_0 ” were shown to be neither weakly P nor T_0 -identification P properties. Within this paper weakly P properties, T_0 -identification P properties, and the long overlooked “not-topological properties” are further investigated, additional topological properties that fail to be weakly P or T_0 -identification P properties are given, and new topological, weakly P , and T_0 -identification P properties are created, including the biggest topological property, and the biggest weakly P and T_0 -identification P property.

Keywords and phrases: weakly P , T_0 -identification P , not-topological properties.
